Stabilizing Pressure Input Orthosis

SPIO PRODUCT GUIDE

SYSTEM	USE	FEATURES
VEST 	• Provides shoulder-trunk-hip stability and mid-line orientation • Increases body awareness • Ideal for children with poor core muscle activation, stabilization, or weakness • Excellent trial orthosis	• Double Layer fabric front panel • 1mm perforated, Velcro sensitive detachable neoprene back panel • Adjustable hook and loop shoulder and crotch strap for anchoring • Larger sizes have removable anchor strap between the legs for toileting
SHIRT Back neck closure	• Assists with primary sensory awareness deficits in upper extremity and trunk • Positive impact on shoulder/arm stability and function • Improves fine motor control	• Single Layer • Hook and loop back neck closure • Long sleeves provide complete coverage of arms but can be cut if less coverage is needed • Made to fit snug over hips
PANTS	• Assists with primary sensory awareness deficits in lower extremity and lower trunk • Combines with vest to improve upright stability and triple layer compression • Combines with shirt to improve full body sensory awareness and double layer compression	• Single layer-lower rib to ankle
UNITARD	• Provides trunk-limb stability and connection • Assists with moderate sensory awareness deficits in addition to axial instability • Combine with shirt for double layer compression from shoulder through hips	• Single layer • Shoulder straps connect shoulders to hips
GAUNTLET (custom only)	• Improves sensory awareness in hand, wrist, and upper arm • Increases stability of soft tissue structures which improves movement control	• Double layer • Open and closed fingers, fabricated thumb • Covers arm
GLOVE	• Improves sensory awareness in hand and wrist • Increases stability of soft tissue structures which improves movement control	• Single layer • Open fingers, fabricated thumb
