

The SPIO® Products

We use a high quality, specially milled fabric that is lightweight, wicking and breathable. The unique SPIO fabric has a high rebound and strong neutral memory that assists the wearer in returning their body to mid-line.

SPIO systems are protected under U.S. Patents 29/581, 245, 29/581, 246, and 29/581, 248 and are registered with the FDA as a Class 1 Medical Device. Because it is an orthotic - not a garment - it may be reimbursable through insurance if ordered by an orthotist or Durable Medical Equipment (DME) provider.

SPIO® Stands Alone

SPIO is a flexible bracing system that provides support and feedback through deep pressure. SPIOs Unique Composition and Design:

- Increases core stability
- Improves balance
- Improves muscle control and tone
- Improves respiratory mechanics
- Decreases response latency
- Reduces involuntary movements and stimming

Who We Are

At SPIO our bottom line is both financial and social:

- All products are made locally in the Pacific Northwest
- We pay a livable wage, not just minimum wage
- We believe in fair labor practices
- We give 100% of our profits to non-profit organizations that are dedicated to helping children with special needs. When you purchase a SPIO you are making a contribution that will help even more children reach their full potential.

3 Easy Ways to Order

- 1 Visit us online at spioworks.com to place your order.
- 2 Call **+1-877-997-7746** to place your order by phone.
- 3 Fax your order to **+1-253-852-0175**.

Orders are processed each weekday and shipped within 24 hours.

A sizing and measurement guide and video can be found at our website.

If you are not completely satisfied with your purchase, you may return your orthosis to us within 90 days for an exchange or refund.

SPIO®

core-max® fabriflex®
THE SPIO® FAMILY OF PRODUCTS

Orthoses are designed for those with Hypotonia, Cerebral Palsy, Down Syndrome, Muscular Atrophy, Athetosis, Autism, and Sensory Processing Disorder.

Order a Custom SPIO

SPIO offers our full product line in standard sizes designed to fit ages birth to mid-teens. We also offer custom-made SPIOs for adults, or those who do not fit into a standard size.

UPPER BODY ORTHOSIS

Long Sleeve

Short Sleeve

The SPIO Upper Body Orthosis with Long or Short Sleeves assists with upper extremity stability/function, fine motor control, coordination and sensory deficits.

LOWER BODY ORTHOSIS

Ankle Length

The SPIO Lower body Orthosis in **Ankle or Knee Length** assists with gait and full body stability when combined with the TLSO or Upper Body Orthosis.

Knee Length

fabriflex®

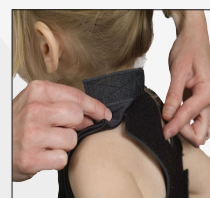

The flexible, versatile, and reusable Fabriflex wraps and straps are designed provide targeted compression, support and muscle activation to the limbs and trunk.

core-max®

QUEST

The SPIO TLSO with para-spinal rigid stays assists patients with poor core muscle activation, balance, coordination, or weakness.

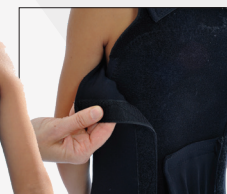

EXPEDITION

The SPIO TLSO with two heat-moldable panels of varied rigidity and support. Providers may use either X-Panel, both simultaneously to provide greater support, custom modify, or construct their own to best meet the needs of each child. Extends from the sacrococcygeal junction and terminates just inferior to the scapular spine.

ODYSSEY

The SPIO TLSO with the moldable, rigid thermoplastic back panel combines the benefit of SPIO's flexible bracing with the custom-molded support of thermoplast. Extends from the sacrococcygeal junction and terminates just inferior to the scapular spine.

WRIST-HAND ORTHOSIS

The SPIO Wrist-Hand Orthosis assists with fine motor control, increased stability, decreased hypersensitivity, and sensory awareness in the hand and wrist.

ARM ORTHOSIS

The SPIO Arm Orthosis assists with full arm stability, fine motor control, increased limb awareness, coordination, and neurological feedback.

CLASSIC SPIO® TLSO

The classic SPIO TLSO with soft neoprene back panel. Assists with poor core strength, balance, and weakness.
